

4G 5G

VISI

Small cell 0.0001 mW/cm² vs. 100 mW/cm² for cell tower

## Low power minimizes exposure.

We're constantly surrounded by electromagnetic energy. Whether you're talking about 5G, 4G or your Bluetooth headset, the physics are the same, and the body's response is essentially identical. You can see in this chart how emission levels from small cells compare to other common radio frequencies (RF)—all many times below what the FCC considers safe.

### The 5G Health Hazard That Isn't.

The *New York Times* shows how misinformation about wireless technologies has spread. [Read More →](#)

### 5G and Your Health.

A scientist who sets global guidelines for 5G explains how we know it's safe. [Read More →](#)
